

SUMMER OF SCIENCE

Virtual Programs

Science never stops, and neither does the Buffalo Museum of Science and Tifft Nature Preserve!

Join us this summer for a fun and socially stimulating virtual program series! Summer of Science invites registrants to explore STEM topics with Buffalo Society of Natural Sciences educators and up to 11 other curious minds each week. Choose from a menu of science and nature themes that combine virtually facilitated Zoom sessions with self-directed offline exploration at home.

Sign up for all nine weeks or for just the weekly themes that interest your child! All registrants are provided with an activity kit for each week they register. All you need is an internet-connected device and common supplies such as basic craft and coloring items and utensils.

AGES AND TIMES

Ages 5-8: Tuesday, Wednesday, Thursday
Facilitated sessions from 9:00-10:30 a.m. and 1:30-2:15 p.m. daily, with self-directed exploration in between!

Ages 9-12: Tuesday, Wednesday, Thursday
Facilitated sessions from 11:00 a.m.-12:30 p.m. and 2:30-3:15 p.m. daily, with self-directed exploration in between!

REGISTRATION

Registration is \$85 per registration per week; price includes cost of activity kit. Please register no less than 10 days prior to the start of the program. Register online at www.sciencebuff.org or contact 716-896-5200 x382 or sgreen@sciencebuff.org with questions.

WEEKLY THEMES

July 7-9 **Birds of A Feather**

From penguins to owls, this week is for the birds! Search for birds in your backyard, neighborhood, or even from your window! Explore feathers and flight and discover the many adaptations of our feathered friends.

July 14-16 **Superhero Science**

If you could have any superpower what would it be? From flight to magnetism, explore the science of superheroes and harness the power of the natural world!

SUMMER OF SCIENCE

Virtual Programs

July 21-23

World of Color

Science and art combine! Explore the science of color and create your own masterpiece!

July 28-30

Fantastic Physics

Do you feel the force? Experiment with things that move and fly to discover the physics and forces that literally make the world go 'round!

August 4-6

Space: Out of This World!

Nothing is as exciting as blasting off into space! This week become an astronomer and explore the planets, stars, Sun and Moon.

August 11-13

Water, Water Everywhere

Why is water so important? Our planet is covered in it and we all need it to survive! Explore water, its many uses, and where we can find it in nature all around us.

August 18-20

Our Marvelous Earth

Explore the exciting science of our marvelous Earth and discover how rocks, wind and water work together to create amazing wonders. It's sure to be a rockin' good time!

August 25-27

All About Animals

From the Arctic and rain forests to your backyard, discover animals living today - and even ones that lived thousands or millions of years ago.

September 1-3

SciJinks

Let's finish up the summer with a bang! Experience the best of the best science activities and demonstrations.
