

Super Scientist Birthday Party

Aspire to be a scientist? Come celebrate and explore just like one! Our **Super Scientist** birthday party is packed with exciting hands-on experiments and discoveries. The fun begins with the **Van de Graaff generator** — sparking curiosity about what electricity is and what it can do. Next, our young scientists will **mix acids and bases in film canisters** to see an exciting reaction. *Why did it pop?* They'll find out! Then, they'll dive into the fascinating world of **Oobleck** — a substance that's both a liquid and a solid. Finally, the party wraps up with an age-specific activity:

Ages 5 and under:

- Make colorful rainbows in a jar while learning about density.

Ages 6 and older:

- Explore chemistry by creating their own vinegar volcanoes.
- It's the perfect blend of fun, learning, and unforgettable experiments!

**Activities can be changed to a different age group if requested upon booking*
