BRICK PLANET

A magical journey made with LEGO® bricks

January 16 - May 16, 2027

Book Your School Group Reservation Now to Save!

Discover how Earth's ecosystems connect, one brick at a time. Like a LEGO® masterpiece, our planet is built from countless interconnected ecosystems, each playing a vital role in sustaining life. Through stunning larger-than-life creations built from millions of bricks, Brick Planet reveals the intricate connections between plants, animals, and habitats.

When even one piece is missing, the whole system changes. Explore the delicate balance that sustains life on our planet through breathtaking brick-built ecosystems that inspire curiosity, creativity, and environmental stewardship.

STEAM Learning Brought to Life!

In *Brick Planet*, students will:

- Explore ecosystems and biodiversity
- Discover how plants, animals, and habitats depend on one another
- Learn about conservation and environmental stewardship
- Experience science and engineering through creativity and design
- See larger-than-life brick creations inspired by the natural world

Book in Advance to Save!

$16 per student
That's a $9 savings per student for groups of 10 or more when booked at least 2 weeks in advance!

One (1) FREE chaperone for every 10 students
$16 for each additional chaperone
